(54) Title: **SYSTEM AND USER INTERFACE FOR HANDLING A PERSON, AND METHOD THEREFOR**

(57) Abstract: The invention relates to a handling system (1) for lifting and/or moving a person from a first position to another. The system comprises a frame including a base frame (2a, 2b) and a lifting frame being part of a lifting device for said person. The system also comprises at least three wheels (3a, 3b, 4a, 4b) positioned in different parts of said base frame and allowing the handling system to be moved over a surface from said first position to another, and at least one user interface allowing said person or another person to control the handling system. Further, the system comprises at least one of said wheels (3a, 3b) being directional control-lable from said at least one user interface and each of said wheels (3a, 3b, 4a, 4b) being mounted pivotally around a vertical axle (va1) for said wheels. The invention also relates to a user interface and a method of handling a person.
